

Playhouses technical specification

J275 - J276 - J277 - J278

Further reinforcement is provided by lacquered galvanised steel supports, located on the underside of the platforms.

3- The play walls and roofs are coloured panels made from a compact material 13mm thick, 70% softwood fibre and 30% thermosetting resin, which stands up to weathering very well. The coloured sides are coated with pigmented acrylic polyurethane resins. This protects them from ultraviolet radiation and damage.

The durable fixings are made of injection moulded polyamide

4- The tubes are made of stainless steel guaranteeing lasting durability and reliability of the equipment.

The stainless steel fixings are protected by polyamide anti-vandal caps.
